

ASHISH PRALHAD GADE

M.Tech. - IT - Cyber Security

Ph: +91-8408976943

Email: ashishgade342@gmail.com

Pune, Maharashtra, India

PROFESSIONAL SUMMARY

M.Tech IT & Cybersecurity student with a B.E. in Information Technology. Familiar with C/C++, Object-Oriented Programming, Data Structures and Algorithms, Operating Systems, and software development concepts. Academic experience with Python, SQL, OpenCV, and web technologies through project work. Familiar with SDLC, software testing, debugging, and problem-solving.

KEY EXPERTISE

C/C++ | OOP | STL | Data Structures & Algorithms | Operating Systems | Windows | Multithreading | Memory Management | VS code

EDUCATION

MIT School of Computing

2025 - 2027

M.Tech. - IT - Cyber Security | CGPA: 7 / 10

Sinhgad Institute of Technology

2020 - 2024

B.E. - Information Technology (Full Time) | CGPA : 7.50 / 10

12th | Percentage: 61.69 / 100

2020

10th | Percentage: 79.80 / 100

2018

PROFESSIONAL EXPERIENCE

B2B demand generation and data solutions company | Marketing / Lead Management / 04 Oct, 2024 - 24 Mar, 2025

Data Solutions | Research

Data Executive

Worked on data management, research, and lead management activities.

Handled data-related tasks with attention to accuracy and quality.

Supported research and data processing activities to meet project requirements.

INTERNSHIPS

Sunbridge Software Services | IT / ITES

05 Apr, 2023 - 05 May, 2023

PowerApps Developer & Project Operations Intern

Assisted in developing business applications using Microsoft PowerApps.

Created automated dashboards and supported application-related tasks.

Documented requirements and supported project coordination.

Worked with Microsoft Power Platform in a project environment.

PROJECTS

AI-Driven Malware Detection

Key Skills: Python | Machine Learning | Flask | HTML/CSS/JavaScript

Developed a software application for detecting potentially malicious files using machine learning.

Implemented data preprocessing, feature extraction, prediction, and result generation.

Integrated backend processing with a web-based user interface.

Tested application functionality and handled errors during development.

Video Steganography Using DCT Algorithm

Key Skills: Python , OpenCV , DCT , Video Processing | Algorithms

Developed a Python-based application to hide and extract confidential data within video frames using the Discrete Cosine Transform (DCT).

Implemented video frame extraction, DCT-based data embedding, data extraction, and frame reconstruction.

Used OpenCV for video processing, frame manipulation, and output generation.

Implemented encoding and decoding workflows with input validation and error handling.

Tested the application with different video inputs to verify data extraction and output quality

C++ File Management System

Key Skills: C++, OOP, STL, File Handling, Exception Handling

Developed a menu-driven C++ application for creating, reading, updating, searching, and deleting file records. Applied Object-Oriented Programming concepts including classes, encapsulation, inheritance, and modular design. Used STL containers and file handling operations for efficient data storage and retrieval. Implemented input validation and exception handling to manage invalid inputs and runtime errors. Tested application functionality with different inputs and use cases to identify and resolve errors
